EPA clean up

To ☐ Zhen, Davis

 We removed extra line breaks from this message.

Hi,,

I'm (b) (6) and I was raised on the Willamette River 80 years ago.

There used to be farms on Highway 30. Deer used to come down to the river to drink. Beavers made their lodges in the banks. It was polluted then and is now but now it's without the wild life and farms.

Willbridge is gone along with the little grocery store and community.

It's all paved over with warehouses and oil tanks. My father talked of hunting for birds in Guilds Lake, a great wet land dredged over in 1935. Moorages were there, Osborn and Aviation no more. I watched them build Gunderson Brothers but had no idea it would become so crowded with industry. A lifetime ago it was polluted. Let's clean it up.
